

Alisher Mansoori

Ghaziabad, Uttar Pradesh, India — +91-9667834132 — alishermansoori9@gmail.com
LinkedIn — GitHub — LeetCode — Portfolio

Professional Summary

- Software Engineer with expertise in developing full-stack and backend applications utilizing TypeScript, React.js, Next.js, Node.js, Express.js, PostgreSQL, and MongoDB technologies. Knowledgeable in developing RESTful APIs, authentication, role-based access control, asynchronous processes, real-time applications, and test automation. Solved more than 500 problems in data structures and algorithms.

Education

Ajay Kumar Garg Engineering College (AKGEC)

September 2023 – May 2027

Bachelor of Technology in Computer Science and Engineering (Data Science) — CGPA: 7.8/10

Ghaziabad, Uttar Pradesh

Experience

Bluestock Fintech

August 2025 – September 2025

Software Development Engineer Intern

Remote

- Created the backend components for authentication, jobs, applications, company workflow, and seeker workflow within the production environment of the MERN stack job portal.
- Implemented JWT authentication and RBAC for the secured routes. Implemented a system for centralized validation, error handling and standard REST API responses.

InternPe

July 2024 – August 2024

Web Development Intern

Remote

- Built and deployed 4 responsive web applications using HTML, CSS, JavaScript and React.js, including an e-commerce storefront, calculator, to-do list and Connect Four.

Projects

TicketGuard – Secure Ticketing Platform

[GitHub](#)

TypeScript, React, Node.js, Express.js, PostgreSQL, Prisma, Redis, BullMQ, Socket.IO

- Developed a full-stack ticketing application to facilitate ticket discovery, digital ticket wallets, ticket transfer, management of organizer inventory, and ticket verification.
- Implemented JWT authentication, token rotation, RBAC, Argon2id password hashing, Zod validation, and server-side authorization. Implemented transaction-based check-in and credential rotation flows.
- Performed unit, integration, security, and concurrency testing and achieved **108/108 test cases passed (100%)**.

NodePattern – Device Fleet Management Platform

[GitHub](#)

React, TypeScript, Node.js, Express.js, PostgreSQL, Prisma, Redis, BullMQ, MQTT, WebSockets, Docker

- Platform to build fleets of devices that allow device registration, telemetry ingestion, real-time device state and remote command execution using MQTT, WebSockets and BullMQ/Redis.
- Reliability patterns to implement retry, idempotency, offline device support and failure recovery in asynchronous workflows.

TemplatOS – UI Ecosystem and AI Content Studio

[GitHub](#)

Next.js, React, TypeScript, Tailwind CSS, Zod, OpenRouter, Vitest

- Produced a consolidated product that integrates reusable UI elements such as widgets, blocks, layouts, as well as an AI content generation workspace.
- Implemented server-side AI queries with Zod validation, normalization, limits, retry logic, time-outs, error sanitation and automated testing.

SolarInvest – Community Solar Investment Platform

[GitHub](#)

React, Node.js, Express.js, MongoDB, Mongoose, JWT

- Designed an investment management platform based on the MERN technology stack using the Controller-Service-Repository architecture.
- Shifted the logic of ROI calculations to the server side and used JWT for RBAC protection of financial operations.

Technical Skills

Programming Languages: JavaScript (ES6+), TypeScript, C++, SQL

Frontend: React.js, Next.js, Vite, Redux Toolkit, TanStack Query, React Router, Tailwind CSS, HTML5, CSS3, Leaflet

Backend: Node.js, Express.js, REST APIs, API Design, JWT, Refresh Token Rotation, RBAC, Zod, Middleware, Validation, Error Handling, Controller-Service-Repository

Databases: PostgreSQL, Prisma, MongoDB, Mongoose, MongoDB Atlas

Infrastructures & Distributed Systems: Redis, BullMQ, MQTT, WebSockets, Socket.IO, Docker, Background Tasks, Queues, Caching, Retries, Idempotency

Security & Tools: Authentication, Authorization, Argon2id, bcrypt, Git, GitHub, Postman, Vercel, Render, Firebase, Cloudinary

CS Fundamentals: Data Structures & Algorithms, Database Management System, Operating Systems, Object-Oriented Programming

Achievements

- Completed **800+ programming questions** on DSA platforms like LeetCode and GeeksForGeeks.
- Developed **2 hackathon projects** in less than 24 to 48 hours.
- Published *The Silence After*, a novella, independently from conceptualization to final publication. [Link](#)
